

Generalidades de las aplicaciones de la IA para la microscopía y el análisis de imágenes

CHRIS WOOD

LABORATORIO NACIONAL DE MICROSCOPIA AVANZADA

18 Noviembre 2024

Current Opinion in Cell Biology

Volume 85, December 2023, 102271

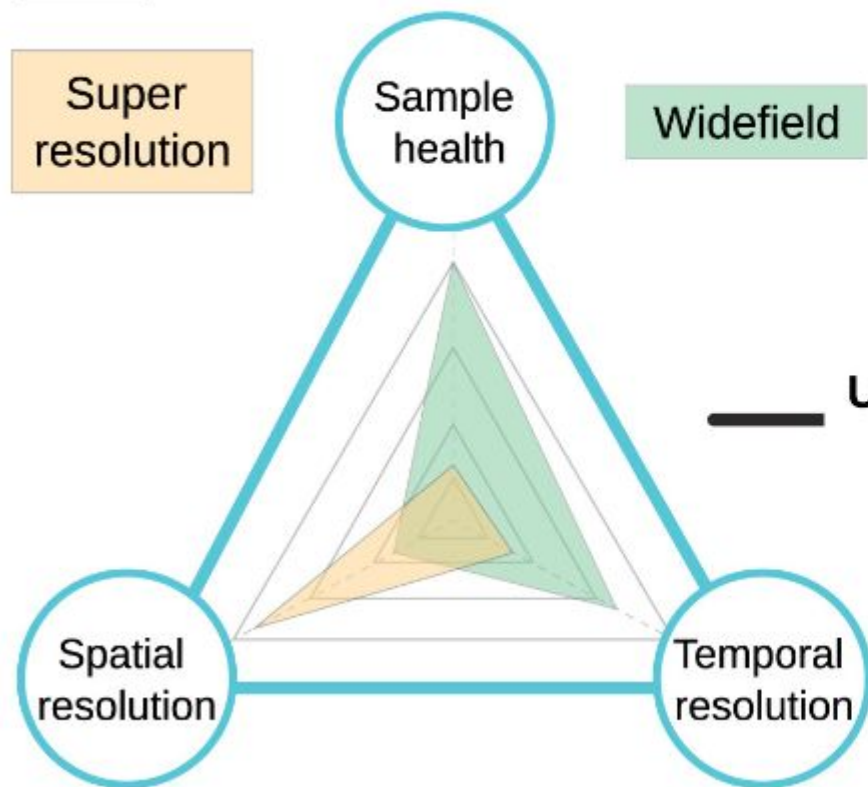

Live-cell imaging in the deep learning era

Joanna W. Pylvänäinen¹, Estibaliz Gómez-de-Mariscal², Ricardo Henriques^{2,3},

Guillaume Jacquemet^{1,4,5,6}  

Image acquisition

— **USABLE
DATA** →

Image analysis

— **BIOLOGICAL
INSIGHTS** →

Improvement of live imaging datasets

Denoising and
image restoration

Super-resolution

Drift correction

Artificial labeling

Analysis of live imaging datasets

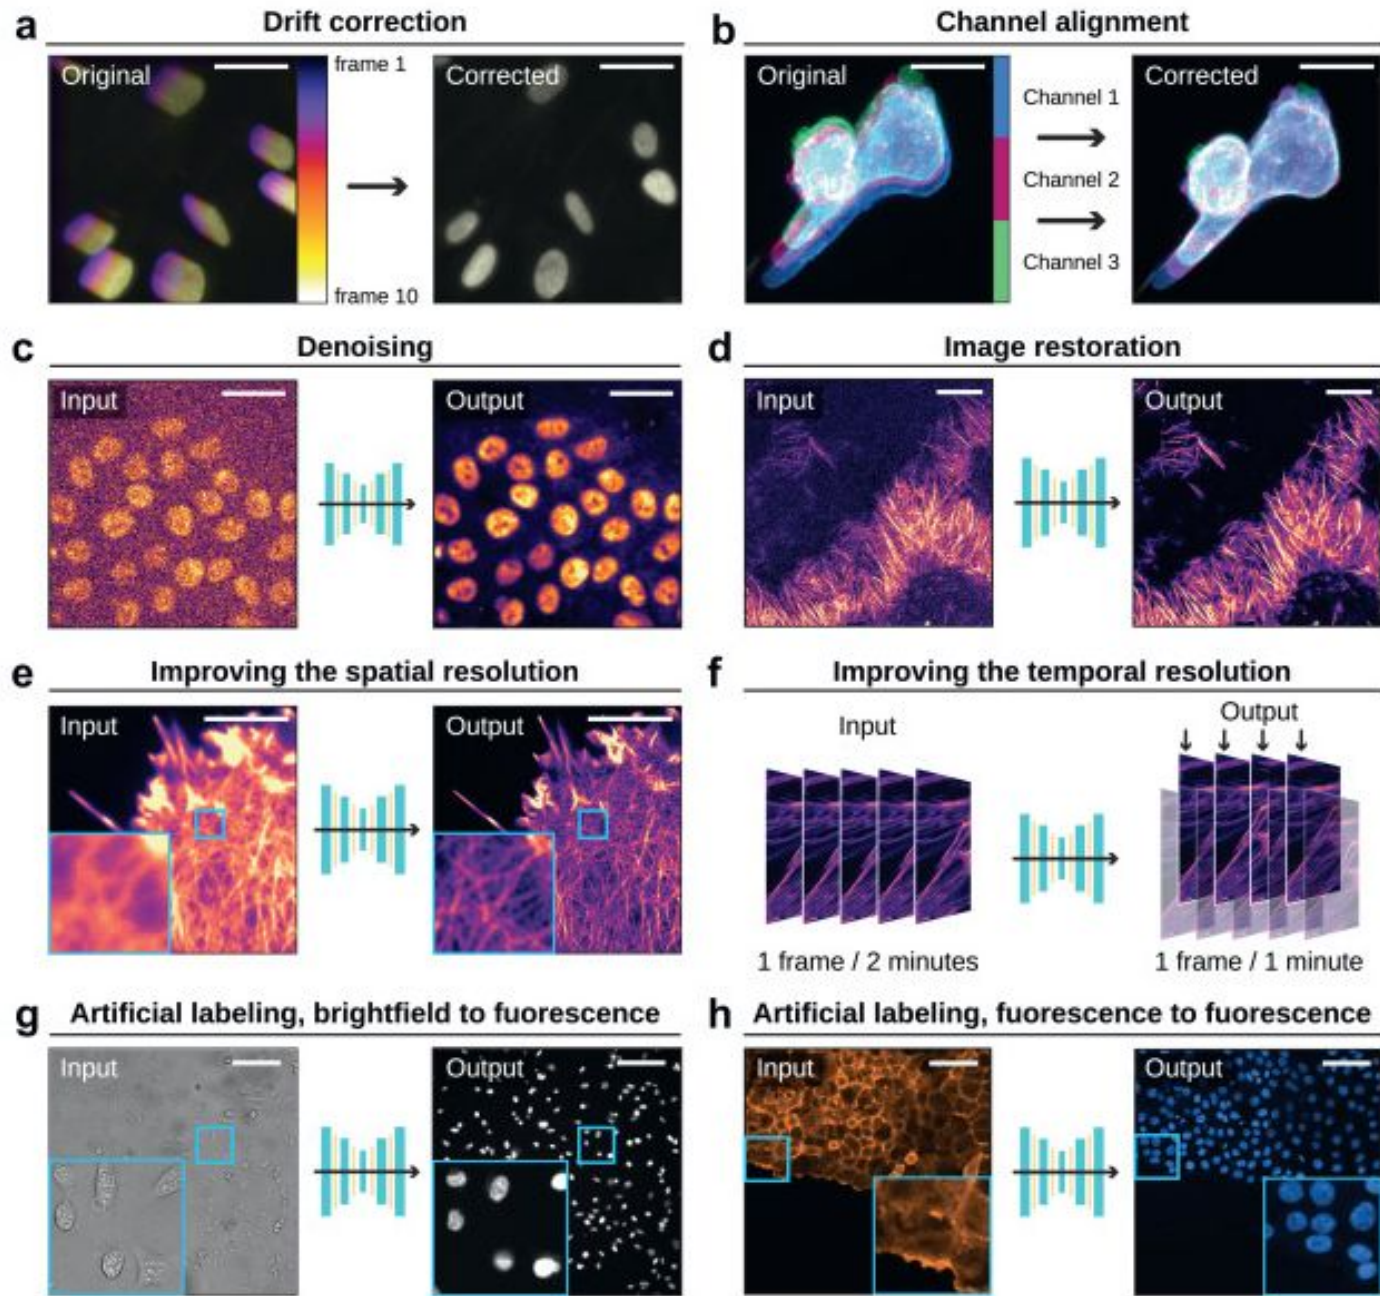

Segmentation and
object detection

Tracking

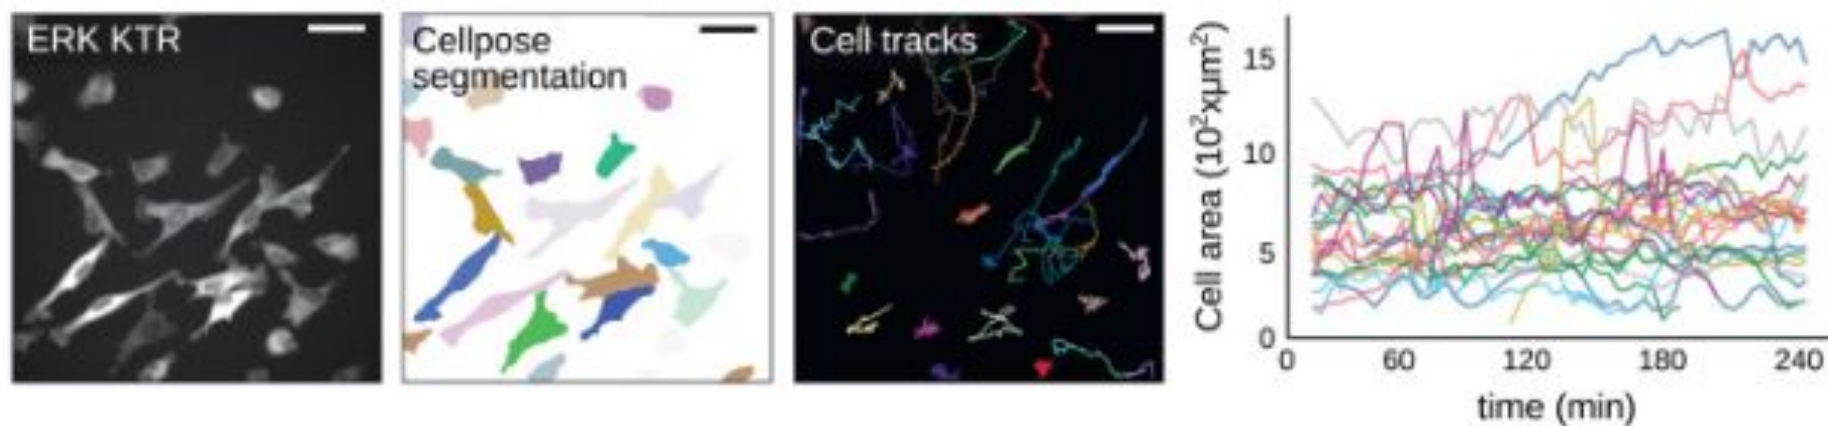

Segmentation and tracking

a

b

Time projections

Tracked object features

Remove temporal order

Data-driven state detection (time-independent)

Phenotypic space visualisation

Global state frequency

Data-driven state detection and phenotypic space visualisation

State

Image acquisition

Feedback loop

- Objective change
- Modality switching
- Framerate adjustment
- Laser-power adjustment
- Photo-manipulation

Image analysis
